ISO 9001 2015 CERTIFIED

AY-SG328-CS-L1 Tempest Level 1 Network Switch

Features

The AY-SG328-CS-L1 is our latest Cisco business class network switch. This switch supports up to 26 fiber optic SFP ports and 2 additional SFP Gigabit based ports.

The switch can be populated with either 100BaseFX or 1000BaseSX fiber optic SFP transceivers.

The high level of security is achieved via a host of controls and features to safeguard your networks.

The chassis is available in a stand-alone design, but can also be 19 inch rack mounted in 1U rack space

Approval Status

AYON CyberSecurity products are routinely tested and certified for compliance with TEMPEST and Military Standard specifications by various U.S. Government Agencies. Products can also be designed and configured to meet custom specifications as required by individual customer demand.

Warranty

Lifetime TEMPEST Integrity.

Specifications	
Ports	26 SFP slots
	2 Gigabit mini-GBIC slots 100BaseFX or LX SFP 1000BaseSX or LX SFP
Memory	128 MB CPU memory
	16 MB Flash memory
Features	56 Gpps switching rate
	41.6 mpps forwarding rate
	VLAN'support, QOS, Time base ACL's.
	Port security, IPMB, DOS attack prevention
	IEEE 802.1X, IEEE 802.1D, SSH, SSL support
	Layer 2/3 switch\routing IPV4/IPV6
	Web management, SNMP, RMON, Console port.
Power Input	120/220V, 50-60Hz, Auto-sensing
Weight	8 Lbs. (no SFP)
Dimensions	1.5" H x 17" W x 10" D
